

Sterling HE Series

High Efficiency
Water Softener

Think Green!

- 4# of salt per regeneration
- Better iron removal capacity
- High flow rates without hardness leakage
- More tolerant of chlorine
- Less pressure drop

A water softener you can feel good about!

Uses only **4** lbs of salt per regeneration.* This represents a 33% savings when compared to standard water softeners. Not only do you save substantial dollars but you reduce the hassle of carrying salt.

HE Water Softeners utilize a revolutionary new resin that has higher kinetics resulting in less salt usage, greater softening capacity, better iron removal and is more tolerant of chlorine.

Specifications:

Model Number	Grain Capacity	Type of Regeneration	Service Flow Rate Peak	Resin Volume	Pipe Size	Salt Storage
HE34	34,000	Meter or Time clock	16	1.0	1" or 1.25"	300 lbs
HE51	51,000		18	1.5		
HE68	68,000		20	2.0		
HE85	85,000		22	2.5		
HEC34	34,000		16	1.0		

NOTE: HEC34 is a spacemaker model with only 11" x 22" footprint and 44" height

*Time clock units are factory set at 4 lbs of salt per cu. ft. and meter initiated at 6 lbs to handle reserve capacity.
